

# VertiKlean® Mop

## Single use foam mop head for VeriKlean Wall Washing System, *Medium*

The VertiKlean single use foam mop head is used with corresponding hardware for wet cleaning walls and ceilings and applying disinfectants in sterile and non-sterile environments. The laser-cut mop head consists of polyester fabric laminated to clean ester foam that provides excellent liquid sorbency as well as good abrasion resistance.

The VertiKlean Wall Washing System provides complete range of motion and is ideal for cleaning hard to reach areas such as corners and ceilings.

Recommended autoclavable cycle is 121°C for 30 minutes.

Available sterile.

## Features & Benefits

- Hydrophilic polyester fabric laminated to clean ester foam, laser cut sealed edge
- Compatible with a wide range of chemicals, detergents, disinfectants and cleaners
- Available in 8, 13 and 15-inch sizes

## Performance Characteristics

### Product Information

Mop head component materials (cleaning surface first)	Knitted polyester fabric / 60ppi polyester foam
Construction	Multi-layer; flame bonded / inert hi-temp adhesive
Chemical compatibility	Recommended for continuous use in most common disinfectant solutions, when mixed according to manufacturers' directions. Recommended limited use up to one hour in "bleach" solutions over 40,000ppm hypochlorite. Not compatible with acetone and other ketones.
ISO Class	4-8
cGMP Grade	A/B - for sterile version, C/D - for non-sterile version
Compatible Mop Frames	2652SS
Shelf Life	For Sterile Products: 2 years from manufacturing date

### \*\*\*Mop coverage

Note that solution coverage depends on many variables including room airflow, temperature, surface type and texture, solution used, and mop application protocols and technique. Because of these variables, coverage data provided may not correspond to visibly-wet surfaces for contact time required for a particular solution. Coverage data is based on mop head applying solution such that the mopped surface is visibly wetted across the full mop path with no dry streaking observed, under controlled conditions. It is the responsibility of the user to determine appropriate coverage to ensure surfaces are visibly wet for the contact time required for their specific solution.
